## Main achievements

**1** We are thrilled to share that the past three months have been a period of great productivity and excitement for HEIR. The HEIR platform's final solution was successfully deployed in all four pilots, marking a significant milestone for our project. We have also been actively engaging with a broader audience through various events and presentations, sharing our results and progress with the public.

**2** We are immensely proud of what we have accomplished thus far and remain committed to continuing our journey. As we enter the project's final months, our focus now shifts to validating the results and demonstrating their impact. We have executed four training and information days in all HEIR's Pilots to accomplish this.

Furthermore, in order to develop a robust dissemination and exploitation strategy, we collaborated with the Horizon Results Booster team.

We recognize that the final year of any project is critical to its success, and we are determined to deliver a solution that will significantly improve healthcare delivery across Europe. We invite you to stay tuned for further updates by following us on our social media channels. Together, let's continue building a better healthcare system for all.

## Plenary Meetings

In the 3 months since our last Newsletter, HEIR organized the following project meetings:

- 8<sup>th</sup> Plenary Meeting,
- Consortium meetings

## Training and Information Days

HEIR held four training and information days for each of its pilots, with the goal of providing training on the HEIR solution to both IT and non-IT professionals in healthcare organizations.

The events were also an opportunity for the HEIR team to present cybersecurity best practices and concerns specific to the healthcare sector to non-IT experts.

## Events / Workshops

### 1<sup>st</sup> INTERNATIONAL WORKSHOP ON SAFEGUARDING CYBERSECURITY IN HEALTHCARE (SCENE 2023)

With the support of the EU-funded projects AI4HealthSec (<https://www.ai4healthsec.eu/>) and SMART-BEAR (<https://www.smart-bear.eu/>), HEIR organised SCENE 2023.

### CYBER SECURITY CHALLENGES IN HEALTHCARE ENVIRONMENTS (Webinar)

With the collaboration of the Horizon Results Booster's team, HEIR organized a Joint Cybersecurity Webinar in Healthcare. The webinar was supported by the EU-funded projects HEIR, AERAS, AI4HealthSec and SMART-BEAR.

### Other Events

The HEIR team actively participated in the following events:

- FIC 2023
- Diabetes Forum 2023

## Blogposts

HEIR, in order to share knowledge and information with a larger audience and share, published the following blog posts:

- HEIR's 1st Layer GUI
- Observatory
- HEIR's UK Pilot

The blog posts are available on HEIR's website (<https://heir2020.eu/blog/>).

## Videos

We have created a series of demo videos to assist our audience in understanding the HEIR solution. These videos can be found on our YouTube channel and are as follows:

- Threat Hunting Module - Overview
- Threat Hunting Module - Technical demo
- HEIR Observatory & Global RAMA Score calculator
- Privacy-Aware Framework - Overview
- Privacy-Aware Framework - Technical demo
- Anomaly Detection Module - Technical video

### Project Coordinator

Prof. Hervé Debar, IMT  
[hervé.debar@telecom-sudparis.eu](mailto:hervé.debar@telecom-sudparis.eu)

Project Duration: 3 years.

Budget: €4.999.957

This project has received funding from the European Union's Horizon 2020 Research and Innovation program under grant agreement No 883275.
